Good morning,

Attached are the BaP files.

Some other examples of final assessments that have been released recently:

EtO: https://cfpub.epa.gov/ncea/iris2/chemicalLanding.cfm?substance_nmbr=1025

TMBs: https://cfpub.epa.gov/ncea/iris2/chemicalLanding.cfm?substance_nmbr=1037

Ammonia: https://cfpub.epa.gov/ncea/iris2/chemicalLanding.cfm?substance_nmbr=422

Subject: Re: BaP IRIS Assessment

Good idea. Vicki and I had a conversation about this last week - including her here.

Subject: BaP IRIS Assessment

Good morning everyone,
Seeing the note below to the Administrator, it occurred to me that this might be a good example of a completed IRIS assessment for me and certainly for Kris to see. Are these 'parked' somewhere on SharePoint or elsewhere, where we might check out and peruse?

Thanks,
Tina

Final IRIS Assessment of Benzo[a]pyrene

On January 19, ORD anticipates releasing the final Integrated Risk Information System assessment of Benzo[a]pyrene. Benzo[a]pyrene is a five-ring polycyclic aromatic hydrocarbon that is released into the atmosphere as a component of smoke from industrial processes, vehicle exhaust, cigarettes, and through the burning of various materials (such as wood, coal, petroleum products, and biomass). The final assessment addresses cancer and non-cancer effects of benzo[a]pyrene from inhalation and oral exposure. This assessment updates the IRIS assessment of benzo[a]pyrene that was developed in 1987.
